

Climate Change Demystified. Science, Consequences and Solutions

Wednesday, September 26th 6:45PM - 8PM
Maple Bluff Village Center, 15 Oxford Place, Madison

Mosquitos plague us in Madison an average 19 more days a year than back in the 1970's.¹ Our climate is likely to feel more like southern Illinois in about 20 years.² We can expect more floods like what we just experienced in our county.³ Learn more about local impacts of our changing climate and how the risk can be minimized with a sensible market-based approach.

Bob Lindmeier, Chief Meteorologist for WKOW channel 27 will come to Northside Madison to discuss our changing local climate, what to expect in the future, and a clear plan of action to minimize the risk to our economy and way of life. Bob, with support from WKOW, often mentions climate change during his broadcast and is a frequent public speaker on the topic.

The event is sponsored by Citizens Climate Lobby, a national non-profit, politically neutral group dedicated to assuring a livable world.

For updates or to let us know you are coming, see [Citizens Climate Lobby Madison](#) on Facebook, or contact Bruce Jamison Madison CCL chapter lead at 244-6665 or brucej@ccly.org.
